● **Edge Confirmed on XAUUSD**

XAUUSD produced 45 trades over 7 weeks with a 67% win rate and +6R net profit. The strategy reliably identifies high-probability order block setups on gold and the Bollinger Band + EMA200 confluence provides meaningful confirmation.

● **EURUSD — Insufficient Data**

Only 3 trades were recorded for EURUSD in the 7-week window. This is too few to draw conclusions. A longer dataset (6+ months) is recommended before including EURUSD in live trading.

● **US30 — No Edge Detected**

US30 showed a 33% win rate even after parameter tuning. Index instruments behave differently from metals and forex. US30 is excluded from the EA build.

Pair	Trades	Win Rate	Total RR	Verdict
The strategy has a statistically meaningful edge on gold with low drawdown.				
XAUUSD	45	67%	+6.0R	BUILD EA
EURUSD	3	67%*	0.0R	MORE DATA
US30	3	33%	-3.0R	SKIP

* 67% win rate on EURUSD based on only 3 trades — not statistically significant.
